Summary

Full Stack Developer with 3+ years of experience building scalable web and mobile applications across SaaS, promotional tech, and Web3 domains. Proficient in **React.js**, **React Native**, **Node.js**, and **TypeScript** — from reusable component architecture and **RESTful APIs** to real-time systems, **Docker-containerized** environments, and **AWS deployments**. Built Binated's hero proofing product from scratch, contributing to a **30%** revenue increase. Delivered across every role: **10K+ app downloads**, **25%** API performance improvement.

Skills

Languages and Frameworks: React.js, React Native, Node.js, Express.js, JavaScript (ES6+), OOPS, SQL, TypeScript, HTML5, CSS3, Tailwind CSS.

Cloud & DevOps:

AWS (EC2, S3, SES), Git, Vercel, Render, Nginx, PM2, Docker, Linux, SSH

Technologies & Tools: Redux, Context API, AsyncStorage, Webpack, React Query (Tanstack Query), React Navigation, Push Notification, Native Modules, Vite, Babel, JWT Authentication, Postman, MongoDB, Axios, Web Sockets, MySQL, Jira, Chrome DevTools, Postman, Webhooks, NPM, Jest.

Work Experience

Binated, Pune July 2025 - March 2026 **Software Developer**

- **Built the Proofing System from scratch in React and Laravel** — architecting a multi-proof annotation platform with side-by-side compare views, polygon/rect annotation tools, per-reviewer approval state tracking, and real-time UI updates without page reloads. This became Binated's hero product in the design-service and promotional industry, directly contributing to a **30% revenue increase** and attracting major enterprise clients.
- Developed UI and designed custom components and hooks for Promolink NX a Laravel and React platform used by Binated to manage design-service operations, client portals, production workflows, HRMS tools, reports, invoices, and API integrations.
- Integrated **OpenAI APIs** and implemented webhook infrastructure for real-time order status notifications to client systems.

Blaccskull Platforms Pvt Ltd, Pune Mar 2024 - Mar 2025 **Software Development Engineer**

- Built and owned the full stack of an online dance competition platform — **React Native** mobile app and **Node.js** backend — leading a team of two developers from architecture to delivery.
- **Containerized** the development environment using **Docker** for consistent local setup across the team.
- **Led** a team of two junior developers in architecting and delivering an end-to-end online dance competition platform, defining the **components** conventions and custom reusable hooks for **REST API** integration to ensure consistency and reduce onboarding friction.
- Managed deployments on **AWS EC2** using Linux, SSH, PM2, and Nginx.
- Grew app downloads from **500 to 10K+** on iOS and Android, cut API response times by 25%, and managed production release builds via Expo **EAS Build**.

Cyberium, Pune August 2022 - Apr 2023 **Web Developer**

- **Collaborated** with designers and architects to shape front-end component APIs and responsive layouts, creating modular **React** libraries that delivered secure, reusable, and scalable UI patterns.
- Built and optimized frontend integrations with **RESTful APIs**, enabling dynamic data flows and improving application security and accessibility.
- Contributed to **Agile** sprints with consistent delivery and maintained task visibility on **Jira**.

Smart Genesis, Pune February 2022 - August 2022 *Junior Software Developer*

- Contributed the frontend of SinghCoin — a Web3 social media platform — using **React** and **Redux**, setting up routing, **route protection**, and global state management from scratch.
- Built core UI components including an NFT Marketplace, NFT cards, social feed, and a blog page with full engagement features (likes, dislikes, comments, share).
- Translated Figma designs into **responsive** React components, ensuring pixel-accurate design consistency across the platform.
- Developed and integrated **RESTful APIs** in Node.js and Express for blog interactions, feed filtering, and pagination.

Education

PES Modern College Pune, Aug 2022 - Jun 2024 Master of Computer Science (MCS) **CGPA: 7.9/10**

PES Modern College Pune, Aug 2019 - Jun 2022 Bachelor of Computer Science (BCS) **CGPA: 8.4/10**

Project Work

- **Feedants - A skill oriented competition and a social media app.**
 - ❖ Built in-app video recording using React Native Camera with FFmpeg compression (60% size reduction) and chunked uploads for reliability on low-bandwidth connections.
 - ❖ Integrated native GPS/Geolocation API for location-based contest discovery and modular REST API layers with JWT authentication for real-time dashboard updates.
- **Dev Bumble - A Social Connection Platform with Real-time Features:**
 - ❖ Built a React Native/Expo developer networking app with JWT auth, swipe-based matching, real-time chat via WebSockets, and Expo Location for personalised discovery.
 - ❖ • Deployed on AWS EC2 with custom domain, SSL setup, and paginated MongoDB feeds using compound indexes for performance.
- **Cinema GPT` - a movie recommendation App with Gemini AI integration**
 - ❖ React app with Gemini AI-powered movie recommendations, Firebase authentication, Redux Toolkit for state management, and mobile-first responsive design.

Coursework and Certificates

- **React JS** – Modern React with Redux (Udemy, 2023)
- **AWS Academy Graduate** :- AWS Academy Cloud Foundations
- **Namaste Node JS** :- Namaste Dev
