<https://utkarsh-ranpise.vercel.app>

Full Stack Developer with 2.5 years of experience building responsive, API-driven web and mobile applications using React.js, React Native, JavaScript, and TypeScript. Experienced in reusable UI components, dashboards, real-time features, REST API integration, and backend development with Node.js, Express.js, MongoDB, and MySQL. Proficient in AI-assisted development workflows using Claude Code and Cursor. Delivered measurable impact including 10K+ app downloads, 30% revenue growth, and 25% API performance improvement. Eager and capable of quickly learning and adopting new technologies to solve complex problems and deliver effective solutions.

EXPERIENCE

Binated — Pune | 07/2025 – 03/2026

Software Developer

- Built a digital proofing platform in React 19 with component-driven development, REST APIs, real-time state management, and consensus-based approval workflows, contributing to 30% revenue growth.
- Developed and maintained multiple SaaS modules including admin dashboards, client portal, and HRMS recruitment pipeline using React.js, RESTful APIs, and reusable component architecture.
- Improved team velocity by 20% through Agile delivery, task estimation, and Jira-based sprint execution.

Blaccskull Platforms Pvt Ltd — Pune | 03/2024 – 03/2025

Software Development Engineer

- Owned end-to-end React Native development of a dance competition platform, scaling downloads from 500 to 10K+ on iOS and Android.
- Built a real-time judging dashboard with optimized video playback, rendering only the active performance and preloading the next 3 to reduce memory use and buffering.
- Built scalable Node.js REST APIs with JWT authentication, dynamic filtering, and pagination, reducing API response times by 25%.
- Led and mentored two engineers code reviews across frontend and API-integration work, managed Expo EAS Android releases, and containerized the development environment with Docker.

Cyberium — Pune | 08/2022 – 04/2023

Web Developer

- Built responsive React interfaces from Figma designs using Tailwind CSS across multiple production projects.
- Improved frontend-backend integration by troubleshooting, debugging, and resolved technical issues reducing production bugs.
- Collaborated with UX Designers & Senior Developers to play a crucial role in delivering UI Rewamp on ETA, ensuring timely project completion with 60% code coverage.
- Developed unit and component tests using Jest and React Testing Library, covering critical user flows and improving regression coverage.

EDUCATION

Master of Computer Science (MCS)

PES Modern College, Pune · 08/2022 – 06/2024 · CGPA: 7.9/10

Bachelor of Computer Science (BCS)

PES Modern College, Pune · 08/2019 – 06/2022 · CGPA: 8.4/10

CERTIFICATIONS

- AWS Academy Graduate – Cloud Foundations
- React JS – Modern React with Redux (Udemy)
- Node JS – Namaste Dev

SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL

Frontend: React.js, Next.js, React Native, Redux Toolkit (RTK), Redux, Context API, Tailwind CSS, HTML5, CSS3, Bootstrap 5

Backend: Node.js, Express.js, Laravel, REST APIs, JWT, WebSockets, Webhooks

Database: MongoDB, PostgreSQL, MySQL, AsyncStorage

Cloud / DevOps: AWS (EC2, S3, SES), Docker, Linux, PM2, NGINX, GitHub Actions, Vercel, Render

Tools: Git, GitHub, Jest, React Testing Library, Webpack, Babel, Vite, Postman, Jira, Axios

PROJECTS

Dev Bumble — A developer networking app

- Built a React Native/Expo developer networking app with JWT auth, swipe-based matching, real-time chat via WebSockets, and Expo Location for personalised discovery.
- Designed and integrated a real-time notification pipeline using FCM, Expo Notifications, Socket.IO, and Node.js, handling device registration, token persistence, push delivery, notification state, and real-time in-app updates.
- Engineered modular RESTful API using Node.js, Express.js, and MongoDB/Mongoose, optimizing database query latency by implementing MongoDB compound indexes and paginated data feeds.
- Implemented a secure authentication protocol utilizing JSON Web Tokens (JWT) and Bcrypt hashing, reinforced by custom Express middleware for route protection, payload validation, and centralized error logging.
- Deployed the production backend on AWS EC2/render using PM2 for zero-downtime process management, configuring NGINX as a reverse proxy with automated SSL certificates via Let's Encrypt.

Feedants — A skill-oriented competition platform where users participate in contests, submit performance entries, get evaluated by expert judges, and compete for top rankings — built across web, mobile, and backend.

- Developed a dedicated judge panel mobile application using React Native, optimized for smooth submission reviews and structured scoring workflows.
- Ensured consistent, responsive UI/UX across both Android and iOS platforms.
- Integrated RESTful APIs via Axios with secure JWT-based authentication and seamless data flow.
- Optimized rendering performance for media-heavy submission feeds, reducing load friction for judges
